IT team wins NASSCOM Innovation 3.0 award

The ideation and implementation of an IT project under L&T Power earned recognition from the national body of software companies with L&T Power bagging the prestigious NASSCOM Innovation 3.0 Award in the category of 'Best IT driven innovation in manufacturing vertical' for its 'IT-enabled Project Review & Monitoring System'.

The IT team of L&T Power developed a system to offer real time remote project monitoring and management by establishing its own 'Project review and monitoring system'.
