Outlook

Indicators are towards softening inflation and stable commodity prices. Recent measures taken by RBI are expected to ease liquidity position. The business sentiment has turned positive on the back of regulatory announcements and the Government's resolve to create a business friendly environment in India. Once achieved, it would further strengthen the investor confidence and provide fillip to domestic manufacturing and infrastructure development. Early translation of various initiatives into sustainable & well administered policies and the ground level implementation of these would hold the key for broad based economic development.

While US economy remains resilient, global economic development remains subdued with Euro zone grappling under debt burden, slowing growth engine in China and Russia & Latin American countries reeling under the impact of falling oil prices. While investments in the Oil & Gas sector in the Middle East may get impacted due to decline in oil prices, it is expected that the spend on infrastructure development would continue in that region.

The Company, with its leadership position in multiple sectors and inherent capabilities, is well poised to capitalise on the upcoming business opportunities, particularly in the infrastructure, Power and Defence sectors, which are likely to benefit from the Government's thrust.
