

LN Touch

Human Machine Interface

About us

Larsen & Toubro infuses engineering with imagination. The Company offers a wide range of advanced solutions in the field of Engineering, Construction, Electrical & Automation, Machinery and Information Technology.

L&T Switchgear, a part of the Electrical & Automation business, is India's largest manufacturer of low voltage switchgear, with the scale, sophistication and range to meet global benchmarks. With over five decades of experience in this field, the Company today enjoys a leadership position in the Indian market with a growing international presence.

It offers a complete range of products including powergear, controlgear, industrial automation, building electricals & automation, reactive power management, energy meters, and protective relays. These products conform to Indian and International Standards.

Other Automation Products -----	16

Human Machine Interface commonly known as HMI are deployed for control and visualization interface between a human and a process, machine, application and appliance. Increasingly, HMIs are becoming an integral part of Factory Automation. L&T introduces its complete range of HMI products that help in improving productivity and system efficiency.

Product Line Up

Technical Specifications

Model Name		F15TAAA	F12TAAA	E10TDAA	E08TDAA	E05TDAA	S07TDAA	S04TDAA
Screen Size		15"	12.1"	10.4"	8.4"	5.7"	7"	4.3"

Core HMI System for Factory Automation Field

Benefits

- In-Built Networks like Profibus, Ethernet, etc
- Facilitates data management
- Helps in easy system upgradation

Interface

Operate / Display

Data Control

(screen editor S/W)
Ln Touch Soft

(Data Management S/W)
Net View
CF Viewer

PC

Ethernet

Profibus DP

Barcode
Reader

PLC, Inverter
PC, Temperature Controller

CF Card, USB

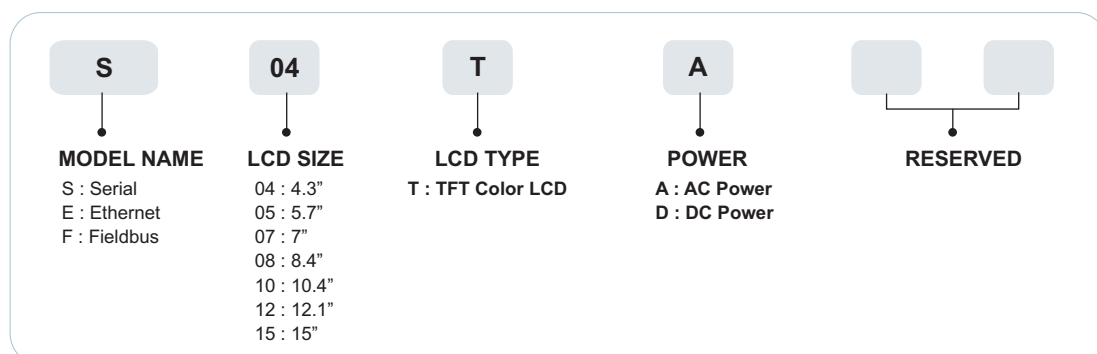

Printer

VM Unit

F Series

Ln Touch : Model Name Terminology

Serial & Fieldbus Network

1. Serial Communication

1:1 Communication

Connect to CPU port or communication unit of controller by RS-232C/422/485

Two Way Communication

Two channel communication with 2 PLCs separately

N:1 Serial Communication

- Control only 1 Controller with many HMIs using Token Protocol
- Restrictive to N:1 (HMI : PLC). Supported PLCs only
- RS-485/422 only

Multi Drop

- Master HMI controls several PLCs or Controllers
- Restrictive to 1:N (HMI : PLC) supported PLC only
- RS-485/422 only

MPI Direct Network

- High speed communication (Fixed 187, 500bps)
- RS-485
- Long distance communication (Max 1.2km)
- Does not need MPI adapter

Slave

Master-Slave (M/S Protocol)
Controller needs M/S program

2. Fieldbus Network

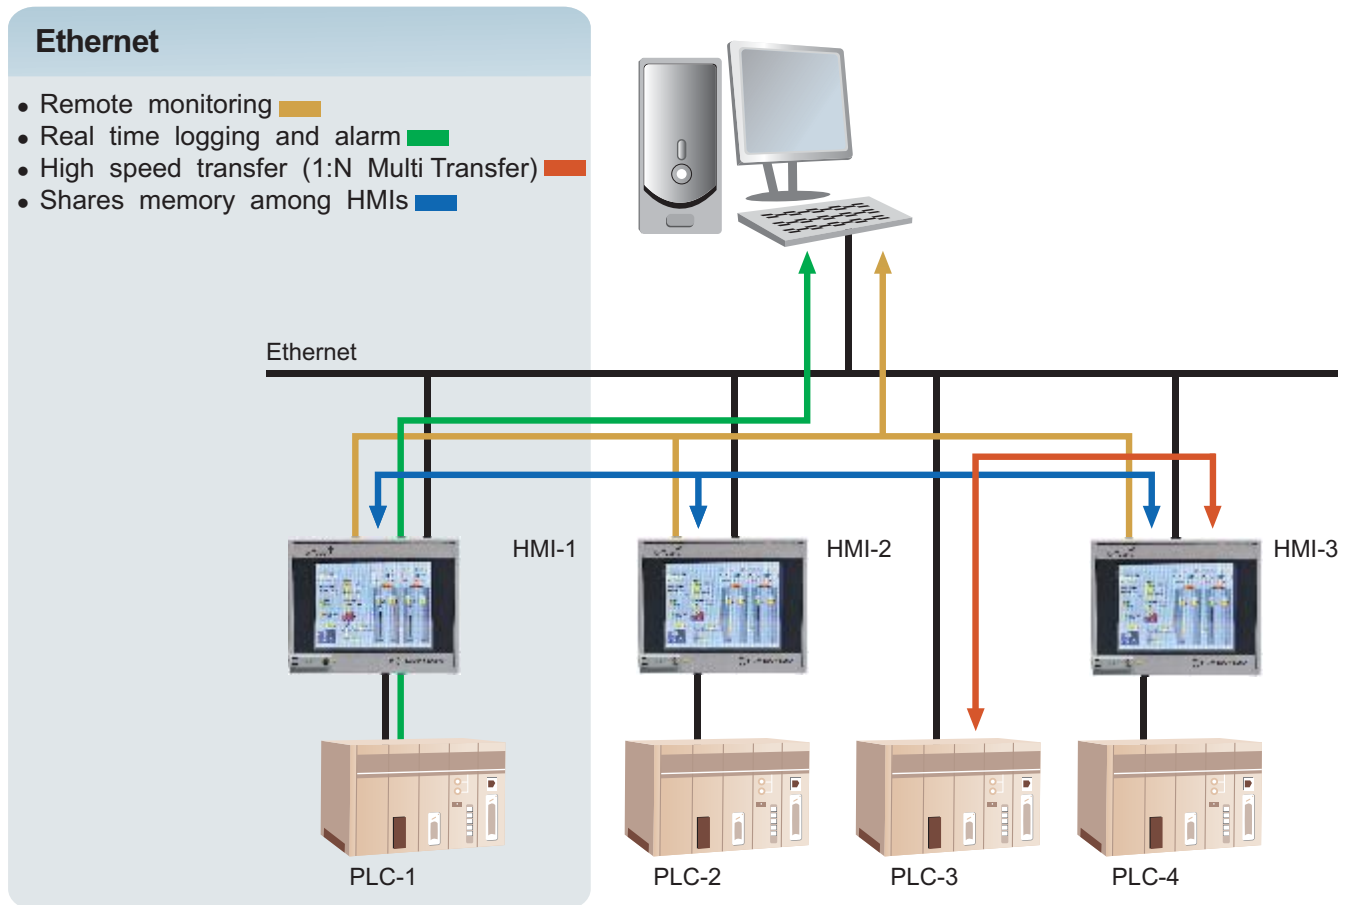

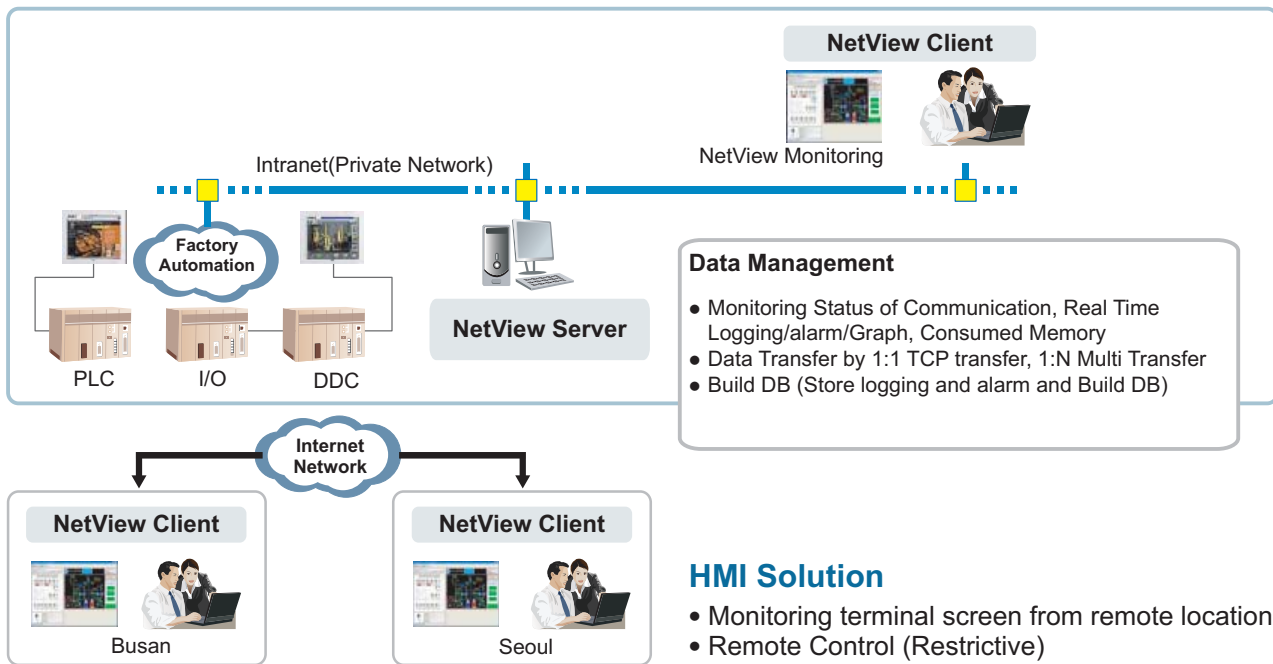

Profibus DP

CC Link

3. Remote Monitoring Service & Application S/W

Optional accessories for communication:

- USB CABLE-MINI : USB program downloading cable for E & F series HMIs
- CC LINK-CARD : Fieldbus option, CC Link
- PBUS-CARD : Fieldbus option, Profibus

Features

1. High Image Quality & Clarity

65, 536 Color & Analog Touch

High Color TFT LCD supporting wide viewing angle.

JPG Support

Supports Real JPG as compared to competitor. Available to Tag, Diagram, Function and every object which uses image. File capacity of JPG is reduced to 90% as compared to bitmap file. So it is possible to raise the efficiency of memory consumption.

2. Gridless Screen

Adopts Analog Touch Screen

Compared with existing matrix touch screen, designing is possible as it has no grid lines. So user can conveniently arrange objects on the screen.

3. Improved user interface

Multi Language Table

Design for conversion of language in the string table

A string table, which makes it possible to simply set a language for each country, so while working user can change the last designed language in the same table by using the programmable function.

Extend Alarm Functions

Easy indication for easy operating

- Various editor key options to control contents in alarm list
- Display in time & reverse time order on events like occurrence/clearance/acknowledge of alarm
- Setting of Alarm & Subsidiary explanation; shift screen/ display subsidiary explanation by using ex-tag
- Display alarms stored in CF card

Windows Font

Supports various fonts

Select any font size or style by using the MS Windows Font on the PC.

* Supports windows font in alarm & message

Graphic library available

	Push Buttons				Lamps		Switch		ETC			
	Rectangle	Circle	Arrow	Tenkey	Pilot	Circle frame	Toggle	Selector	Fan	Tank	Value	Pipes
Image												

Adopt graphic images which are often used at sites. Classification by object is easy so it can be used for various product groups. Also supports high quality vector library, makes user interface very convenient.

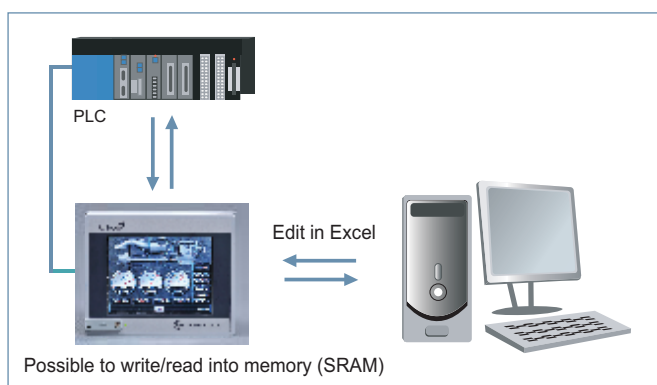

Security setting

- Set up password & security level for each screen
- Password ten key to input password like default ten key
- Max. 16 levels of security settings and initialization of levels

Recipe

Saving data such as the conditions for mixture or processing of materials into HMIs inner memory (SRAM) and then, to read/write in PLC that need the data. For instance, create data to write in PLC and then, write data values, which are consecutively created from specified device. It offers the function of reading large quantity of device values from PLC that is consecutively connected from a specific device. When power is OFF, recipe maintains the data that was saved last.

Pass Through

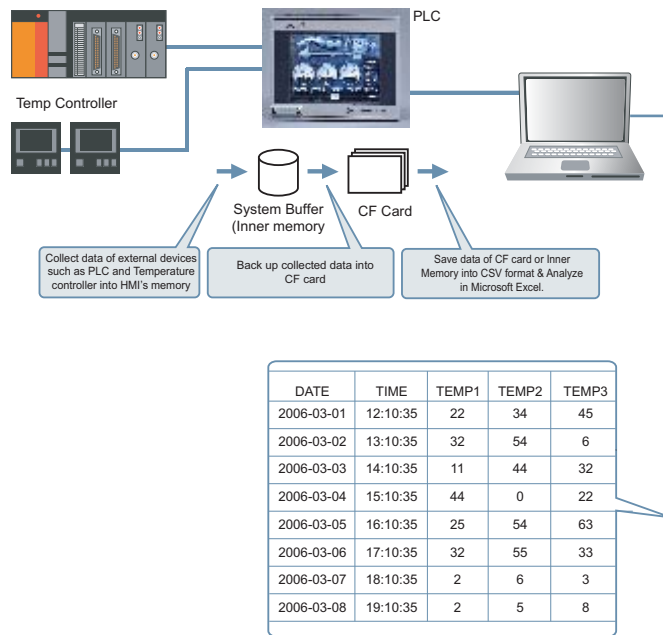

Summary : Through the PC which is connected to COM 1 Serial port of HMI, control the PLC which is connected to COM 2 Serial port of HMI via HMI

Function :

1. Download, upload, monitoring the program of PLC via COM2 of HMI
2. Direct Communication with Controller via COM1 of HMI

Data Logging

Collect data of external devices such as temperature controller and PLC into HMI's memory according to the conditions for period and device value. Basically logging is saved in SRAM (256KB) or CF card and back up in CF card or USB memory stick. It is possible to represent logged data into graph using recorder tag and extended graph tag. Also possible to convert into CSV format which can be used in PC so it is possible to analyze data in Microsoft Excel.

Logging Table

Display the stored data in designed format of table

- Assignment of title name to each word
- Scroll stored data with up & down, right & left direction
- Display stored data in both SRAM and CF card
- Easy interface of data backup to USB from CF card through file manager program

Recorder

Simple checking of logged data with graph

By adding recorder tag, it is possible to represent the data values, which are saved through the logging function, in graph and then, monitor the past and the present history. It is possible to represent the data values, which are saved through the logging function, and the files, which are saved in not only the inner memory, but also CF cards, in graph. It is possible to show the past information by use of a scroll switch only. It is possible to represent the cursor or the device value and the time the cursor is located.

4. Inbuilt Interface

USB and Ethernet built-in

5.7"~10.4" LCD Model

12.1"~15" LCD Model

1. USB Host/Device built-in

Through USB interface, connect USB storage (stick) and transfer the data

2. High speed transfer with PC through Ethernet

Upload/download of program and data communication such as logging, alarm, and recipe have become fast and simple. By use of various kinds of Ethernet package software, it becomes possible to remote-monitor and control from PC

Use of CF card and USB memory

1. Effective use of CF card and USB memory

It is possible to save PLC data in CF card or USB memory, and then convert them into CSV data when necessary, and then, to make out a daily or a monthly document. (However, in the case of USB, it is possible to save PLC data only if data is copied from CF card.) It is possible to save picture, OS, or font files in CF card or USB memory, and then, to transmit to the HMI's memory. In case there are several HMI's, set-up is possible only by transmitting picture program to each HMI with a CF card or USB memory.

Data management by File List

1. Data Management Tool for CF card and USB memory

- Copy data (logging, alarm, OS, fonts, screen program) to both CF card and USB in RUN mode
- Easy interface to data back up & operation by using USB memory & CF card

Barcode reader and roll printer

1. Communication of Barcode reader and roll printer

Save ASCII data, which is read from a barcode reader, in PLC designated by a user or HMI's inner memory (SRAM). It is possible to temporarily designate completion byte which can confirm that barcode data has been successfully read. It is possible to print data by connecting with the roll printer. The above connecting devices all use RS-232C interface to communicate.

Master Screen

- Can set Master Screen (No limit of diagram, Tags)
- Can be applied in each base screen
- Can not be applied in special designed based screen
- Increase the efficiency of memory consumption by using master screen

Frame

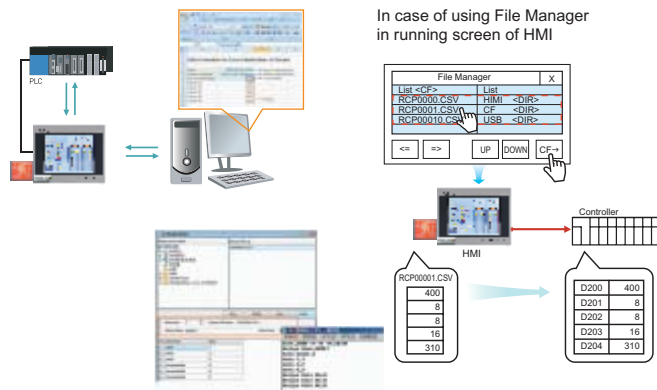

- Supports 4 Frame settings without any limit on its number
- Available to raise the efficiency of memory consumption to use frame
- Support Frame Editor Mode conversion in base screen with Icon
- Assign the area of Frame with drag of mouse and register tags and diagrams in Frame Editor mode
- Select Frame which is registered and apply them to base screen

- Available to set the group of object (diagram, Tags) visible or invisible
- After setting the group, user can assign them for Bit condition
- Support object to pop up without window screen and window tag

Recipe transfer via CF card

- Save CSV format data to CF card in MS excel
- Transfer above CSV data to HMI or PLC
- Provide easy interface so that user can edit the data in MS excel
- Moreover CF Recipe maker supply solution to easy interface as below

Library Viewer

- Support drag & drop interface
- High speed browsing
- Support detail information of image
- Adding images by drag & drop from Windows explorer

Address Input/Auto Completion

- Input address by keyboard
- Various tooltip appears according to device
- Support auto-completion
- Also traditional keypad is possible

Figure & Tag Specification

- Real-time previews
- Clear, easy-to-understand Specification

Memory Viewer

- Address assignment can be visually shown, ensuring by icon efficiency
- By clicking on the used address, the Tag IDs where the address are used will be displayed

Project Manager

- Support Multiple project files
- Copy with screens or list
- Import/Export

Multiple Language Table

- Simple copy & paste functions to place data into the text table after translation in CSV or Excel
- The language of other countries input is possible regardless of a language of the OS by supporting Unicode

Alarm / Message Table

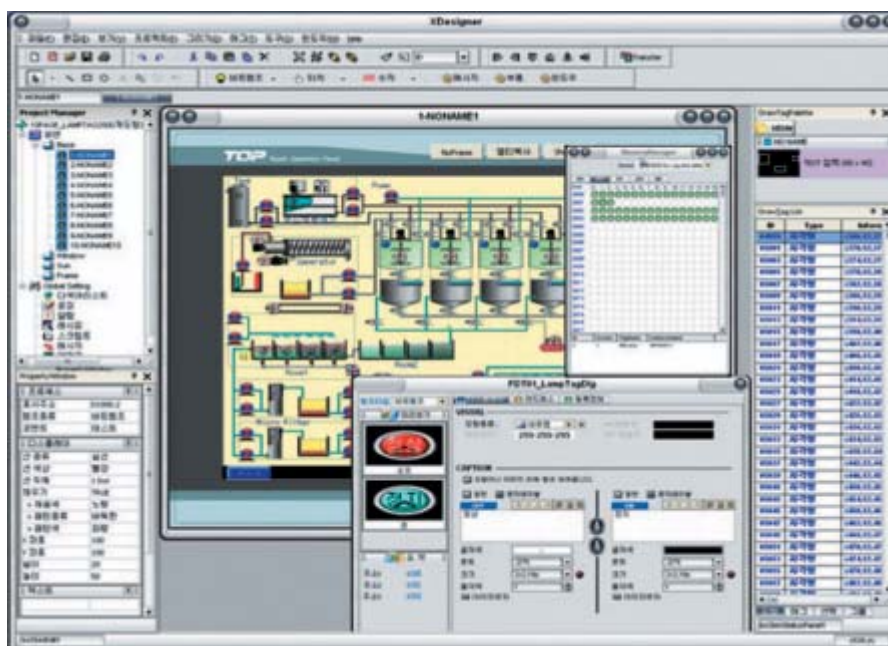

- Input address by keyboard
- Excel compatible
- Image text/Text table possible

Fast Editing

- Regardless of plentiful tags or drawings or images, drawing and registration are comfortable

1 Project manager

- Intuitive and easy interface
- Manage two or more projects

5 My Clipboard

- Managing user libraries
- All tags, drawings, groups and images are possible

2 Convenient User Interface

- Support standard MDI Type & Tab Type

6 Information list

- All objects registered are shown
- The fastest view

3 Menu, Toolbar

- Simple/Convenient layout of Icon
- Grouping tags with similar themselves

7 Tag dialog

- Support previews
- Changed all of olders

4 Memory View

- Address assignment can be visually shown

8 Property list

- Summarize properties of selected objects

- ▶ Open/manage multiple project files simultaneously
- ▶ The most fastest editing of numerous objects in screens
- ▶ Memory map
- ▶ Support My Clipboard
- ▶ As specification, Preview can be done
- ▶ Support image-libraries of vector
- ▶ Support Layer
- ▶ Support snap to object
- ▶ Support lock/unlock each object
- ▶ A wide variety of attractive libraries are prepared
- ▶ Change tags within familiar tags
- ▶ Make/Modify date/time of object can be issued
- ▶ Guideline alignment
- ▶ OFF-Line simulation
- ▶ Text table in Unicode
- ▶ New script editor
- ▶ Fix and Hide (Not transferred) function in all objects
- ▶ Resolution converter
- ▶ Input address by keyboard with completion automatically
- ▶ Support variables of address
