L&T Power Wins National Energy Conservation Award

L&T-MHPS Boilers (formerly L&T-MHI Boilers Private Ltd) won the prestigious National Energy Conservation Award for the year 2013 presented by the Ministry of Power.

The award recognises the contribution of L&T-MHPS Boilers and the viable solutions it offers for energy conservation.

Mr. A.S. Lamba, Whole Time Director and Group Chief Executive, L&T-MHPS Boilers, received the award from Mrs. Neerja Mathur, Chairperson of Central Electricity Authority on September 23, 2014 in a function in New Delhi.

The National Energy Conservation Awards were instituted in 1991 to reward industrial units who have led major endeavours towards the efficient utilisation and conservation of energy. The Bureau of Energy Efficiency (BEE) coordinates the Energy Conservation Awards scheme of the Ministry of Power.

L&T-MHPS Boilers is a JV of L&T and Mitsubishi Hitachi Power Systems, Japan. It carries out design, engineering, manufacturing, maintenance and servicing of supercritical boilers and pulverisers in India at its advanced facility in Surat. Supercritical technology is widely recognised as the most eco-friendly mode of power generation as it is more fuel-efficient, occupies a smaller footprint and needs less water.
