

L&T HYDROCARBON NEWS

L&T-Valdel wins ICC award for Engineering Excellence

L&T-Valdel Engineering Limited (LTV) has won recognition for engineering several of India's landmark hydrocarbon projects. The most recent was the highly successful MHN Process Platform and Living Quarters Project.

In 2012, the Indian Chemical Council (ICC) honoured LTV with the award for excellence in Chemical Plant Design & Engineering of the MHN project.

The LTV management team proudly receives the ICC Award

ICC, a pioneer in instituting National Awards, is dedicated to the growth of India's chemical industry. It confers prestigious annual National Awards to encourage excellence in various fields. Established in 1938, it has multiplied its functions and offerings to cater to the varying needs of the Indian chemical industry. The ICC National Awards, given under various categories, recognize outstanding achievements by companies as well as individuals among their peers in the industry.
