L&T achieves synchronization of 660 MW Supercritical unit of Chhabra project in record time

Larsen & Toubro Limited (L&T), executing 2x660 MW supercritical thermal power project at Chhabra in Rajasthan, has achieved synchronization of its first 660 MW supercritical unit (Unit-5), on October 2, 2016, in record time of 42 months and four days from the date of Notice to Proceed. The thermal power project is being developed by the state utility, Rajasthan Rajya Vidyut Utpadan Nigam Limited (RRVUNL), India.

The synchronization is significant since it is the fastest synchronization for L&T amongst all its other projects to date and the speediest one so far for any indigenously manufactured supercritical unit in India. Mr. Shailendra Roy, CEO and Managing Director-L&T Power, and Whole-Time Director, L&T said, "The synchronization achievement shows that L&T is well equipped to handle tighter project schedules and meet customer expectations. In this case, L&T has bettered its own record."

L&T-Sargent & Lundy (L&T-S&L) carried out Complete Basic and Detail Engineering for this project. L&T-S&L extended full on-site and off-site engineering support to L&T for on-time completion of EPC activities, which aided in successful synchronization at site.

About L&T-Sargent & Lundy

L&T-Sargent & Lundy is a 50:50 Joint Venture between Larsen & Toubro, India and Sargent & Lundy^{LLC}, USA. L&T-S&L provides a complete range of Engineering and Design for power plants from concept to commissioning of Open/Simple cycle plants, Combined cycle plants, Cogeneration plants, Coal based plants - both Subcritical and Supercritical technology and associated auxiliaries. L&T-S&L is also expanding its horizons in the Renewable (Solar/Wind/Biomass) Energy and Transmission & Distribution space.

Our Vision

"To become a leading Integrated Engineering Solutions provider in the global power sector, continuously creating value for our stakeholders"
