Measures like demonetisation, GST, RERA and the Insolvency and Bankruptcy Code are all aimed at enabling growth, facilitating a conducive business environment, widening the tax base and channelising investments in essential infrastructure needs of the country. All these measures along with faster implementation of supportive policies, are likely to be the vital levers of growth in a favorable economic environment and bodes well for the future of Indian economy.

Most major economies are witnessing growth conditions amidst volatile geo-political developments. Rise in oil and commodity prices are encouraging review of market expansion strategies and investment opportunities. Tax reforms in USA, Middle East and elsewhere are resetting the global competitive landscape.

The Company seeks to pursue interesting opportunities for growth both in domestic and international markets. The Company possesses the necessary capability to continuously rebalance its approach and strategy to benefit from the dynamic business environment.

Overall, the Company continues to focus on profitable growth, capital efficiency and productivity measures with the aim of enhancing Return on Equity.
