1.0 INTRODUCTION

1.1 Vigil Mechanism

Good governance is an integral part of the existence of a company. It inspires and strengthens investors' confidence by ensuring the company's commitment to higher goals and profits. This objective is achieved by adopting transparent procedures and practices, having in place effective machinery to address the concerns of all stakeholders, keeping shareholders informed about developments in the company and ensuring effective control over the affairs of the company.

The Company is committed to the highest possible standards of openness, probity, and accountability. In line with that commitment we expect directors and employees that we deal with, to come forward and voice genuine concerns.

Keeping this in mind and to facilitate this process, the Company has formulated a Vigil Mechanism Framework to enable directors and employees to report genuine concerns.

The Vigil Mechanism Framework is a structured process, which encourages and facilitates directors and employees to report without fear, wrongdoings or any unethical or improper practice which may adversely impact the image, credibility and/or the financials of the company, through an appropriate forum. The objective is to maintain a redressal system which can process all complaints concerning questionable accounting practices, internal accounting controls, or fraudulent reporting of financial information and anti- social conducts.
