## Leadership Development Academy Earns Green Campus Platinum Rating

Affirming L&T's commitment to sustainability and eco-efficiency, the Company's very own Leadership Development Academy (LDA) at Lonavla has earned the prestigious platinum rating for Green Campus from the Indian Green Building Council (IGBC).

World-class in every way, LDA scored high on multiple parameters - including rainwater harvesting and overall energy savings, with mitigation of CO<sub>2</sub> emissions by up to 62 tonnes per annum.

LDA's natural topography and landscape, sensitivity towards the differently-abled, use of natural light and an efficient ventilation system, the heat-island effect on the roof, wastewater treatment, employee

collaboration areas and recreational facilities were some of the important factors that contributed to LDA's overall rating. LDA's initiatives for reducing its carbon footprint include site solar panel installation, energy efficiency improvement projects and tree plantation drives.

Mr S N Subrahmanyam, CEO & MD, has appreciated the Corporate HR team for this recognition.

LDA offers world-class infrastructure facilities to develop future leaders and global corporate entrepreneurs. Since inception in 1997, it has benefitted several L&T's businesses and other select corporates.

Testifying to LDA's commitment to sustainable growth are significant honours garnered earlier - the CII-Energy Efficiency Unit and IGBC - Green Campus Gold rating awards in 2019 and the State Level Award for Excellence in Energy Conservation and Management conferred by Maharashtra Energy Development Agency in 2020.
