L&T among top 10 of LinkedIn's 25 best workplaces in India

Only infrastructure company to feature in prestigious list

Living up to its reputation as a great place to work, L&T has featured in the top 10 of LinkedIn's 2022 Top Companies list in India. This recognition reaffirms L&T's continuous efforts for the last several years in taking resolute steps towards fostering and promoting talent.

This coveted position for L&T, which was described as one of the "best workplaces to grow your career", comes in the backdrop of the uncertainties of the COVID-19 pandemic. This is the second successive occasion when L&T has featured in LinkedIn's Top Companies list of best workplaces in India.

What makes this recognition commendable is that L&T was the only infrastructure company to feature in the top 10 of 25 companies among which are a number of IT, e-commerce and consulting organisations in India. The list was the outcome of a rigorous study of LinkedIn's 740 million global members.

L&T made this mark on the basis of the advancement it made across seven parameters such as ability to advance, skills growth, company stability, external opportunity, company affinity, gender sensitivity and educational background. According to LinkedIn, "while many companies are focusing on hiring freshers, Larsen & Toubro is focusing on creating talent that is groomed for industry requirements".

Expressing his sense of elation, Executive Vice President & Head - Corporate HR, Dr C Jayakumar said, "For years, L&T has encouraged a culture that not only boosts performance, transparency and objectivity for all employees so that they are able to build their careers and grow within but has also been considerate and empathetic towards them. It is in L&T's DNA to hire the best and to groom in-house talent. In this disruptive age of technology, L&T looks forward to help its employees in their careers and to succeed professionally. We have in our sights a workplace of the future in which the focus will be on recognising technological achievements, meritocracy, providing aspirational assignments and succession planning".
